## Findorff Building Addition Helps Mark Major Milestone

MADISON – J.H. Findorff & Son Inc. (Findorff) is excited to announce the recent completion of its expansion, which was celebrated with a ribbon cutting ceremony at its headquarters in Madison, Wis. The Company is proud to have accomplished this major milestone during its 125th anniversary. Totalling over 22,000 square feet, the addition has nearly doubled the size of Findorff's office and accommodates over 150 people. As a means to further encourage teamwork, streamline efficiencies, and increase productivity, various state-of-the-art environments were part of the project's scope, including the construction of new training spaces for both office and field staff, as well as new conference rooms, workout facilities, collaboration areas, plus much more.

The ceremony was comprised of a heartfelt speech from Company owners and the gift of a blue spruce from employees to commemorate the building's addition. Vice President Mike Dillis spearheaded the expansion and was proud to be part of a new chapter in Findorff's history. "It has been incredibly exciting to witness our growth over the last few years," said Dillis. "Since I started at Findorff in 1982, I couldn't have imagined where we would be today. As we build our talented staff to meet growing industry demands, our addition exemplifies our ongoing commitment to hard work and quality craftsmanship."

Additionally, this exciting undertaking in the Company's history would not have been possible without a great team. Much gratitude goes out to the men and women whose craftsmanship continually exemplifies the superior quality Findorff strives for as well as those who helped Findorff's vision for growth become a reality. Our design team included: Potter Lawson Architects, Pierce Engineers, D'Onofrio Kottke & Associates, and Ken Saiki Design. Additional key members in the construction of Findorff's addition were: Nickles Electric, General Heating and Air Conditioning, Hooper Corporation, plus several leading subcontractors and suppliers in the area.

###
